City Council Agenda Item Request
Submit to Clerk's Office
No later than 30 days before proposed Council meeting

1. **Date submitted to Clerk's Office:** 07/29/25

2. **Primary contact person and Department requesting agenda item:** Walter Ear, Interim Capital Management Director, and Dustin Clemens, Capital Projects Division Manager

3. **Requested Council meeting date:** August 26, 2025

4. **Subject:** Helene Recovery: French Broad Riverfront Parks Recovery Project, Professional Services

5. **Action Requested:** Adoption of a resolution authorizing the City Manager to enter into a contract with Sasaki Associates, Inc. in the amount of $4,581,773, for design and engineering services required to rebuild the French Broad Riverfront park system; and further authorizing the City Manager to execute any change orders that may arise during the project up to the contingency amount of 6% ($274,906); and approval of a budget amendment of $4,856,679 to add federal and state funds to the General Capital Projects Fund.

6. **Note if time sensitive, and why:** Yes, Recovery related

7. **Potential fiscal impact(s) - if known by staff at time of request:** The proposed contract for this project, including contingency, totals $4,856,679. This amount is expected to be fully offset by reimbursements: 90% through the Federal Emergency Management Agency - Public Assistance program and the remaining 10% from state sources for damages. Furthermore, we will pursue additional funding for project mitigation and enhancements from Hazard Mitigation Grant Program and Community Development Block Grant – Disaster Recovery.

8. **Identify all vendor outreach for Minority & Women Owned Business Enterprises (MWBE).**
    - This is a professional services qualifications based selection process following NCGS 143-64.31
    - Staff performed outreach to minority and women owned businesses (MWBE) through solicitation processes using the NC electronic Vendor Portal (eVP)
    - Staff also contacted twelve MWBE vendors directly with notification of upcoming City of Asheville professional services opportunities, this project being one of the opportunities on the list.
    - Twenty one firms responded to the RFQ. SASAKI, Inc. was selected as the most qualified firm based on the criteria listed in the RFQ.

9. **Identify all Boards, Commissions and Council Committees with tentative dates - add in the vote and recommendation from each Board:** N/A

10. **Identify key issues:**
    - In late September 2024, the City of Asheville experienced unprecedented rainfall both from Tropical Storm Helene and a predecessor heavy rain event. A state of emergency covering Asheville was declared on September 25th, 2024 in relation to Tropical Storm Helene.
    - It is estimated that storm damage to city-owned infrastructure totals at $1 billion, and that rebuilding will take years.
    - The focus of infrastructure recovery, in the short term, is to assess damage and lay the groundwork for the long-term effort. The City is committed to doing this in a way that promotes efficiency and ensures maximum use of outside funding sources.
    - FEMA Public Assistance (FEMA PA) guidance recommends grouping damage assessment and repair into logical projects.
    - The French Broad Riverfront Parks have been combined into one FEMA PA project (#956981) and includes Carrier Park, French Broad River Park, Amboy Riverfront Park, Craven Street trailhead & boat access, Jean Webb Park, Wilma Dykeman Greenway, French Broad Greenway and City owned property at 314 Riverside Drive.
    - On April 24th, 2025 staff posted a Request for Qualifications (298-FBRparkRecovery-FY25) for this project soliciting statements of qualifications from interested design firms for full design services, including a review/inventory damages, providing resilient design services, cost estimates and FEMA coordination.
    - Twenty one different statements of qualifications were received from across the country.
    - A seven member selection committee evaluated and ranked the statements of qualifications and interviewed two firms.
    - Sasaki Associates, Inc., with offices in Boston, MA and Denver, CO was selected as the most qualified firm based on the criteria listed in the RFQ.
    - Funding for this project is anticipated to come from multiple sources, including FEMA PA, HMGP and CDBG-DR grants.
    - The scope of this design contract includes early site investigation, cost estimating, FEMA coordination, flood modeling, community engagement, and design through the 30%/60% design phase. Further Design Development through Construction Administration phases will be issued through a contract amendment once the design ideas are vetted and funding sources are more developed.
    - The base scope of this phase of the project is to have all landscape improvements and new building facilities be designed to be compliant with or enable SITES V2 and LEED V5 certifications.
    - The schedule of this early project design phase is expected to last through Summer 2026.
