Explanation and Justification for the Budget Revision: ADA Guideslines says that we must have a wheelchair scale with an entrance and exit ramp or "equivalent facilitation," which means that healthcare providers can use other methods to provide the same service to a patient with a disability as long as it is as accessible, or more accessible, than the requirements. For example, there are some types of examination tables that have a scale built into them that could be used in place of a wheelchair accessible scale. We currently do not have a wheelchair scale so purchasing this exam table with a built in scale would put us in complaiance with the ADA guidelines.
