TSUNAMI

VS

The Other Guys

Images taken at the exact time, exact place, under minimal lighting conditions.

* CD63 comparison to follow

TSUNAMI

Plug and Play Installation

No extensive infrastructure required

Rapid-Deployment

Record within minutes of adding power

Diverse customers such as NASA, U.S. Military, Housing Authorities, Cities, Police Departments and Universities.

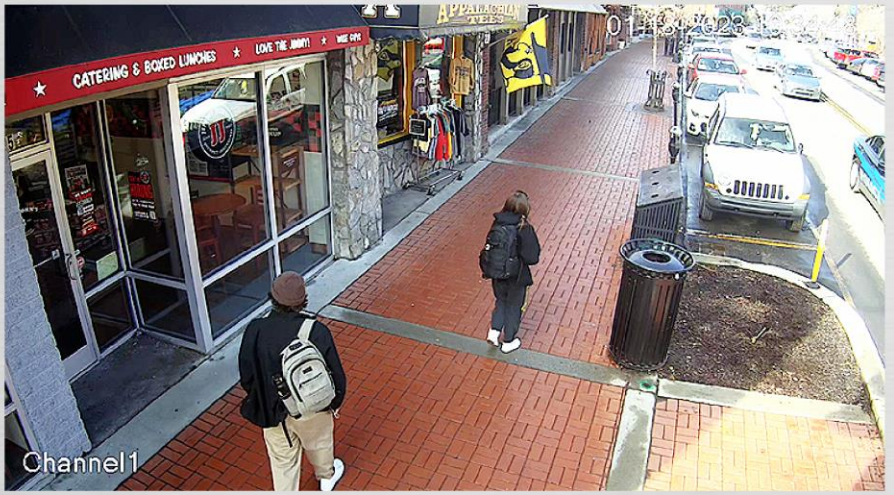

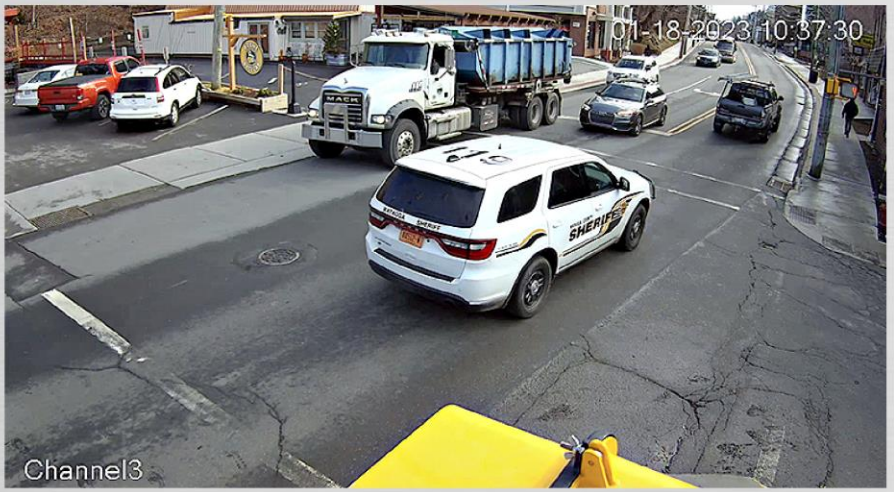

TSUNAMI

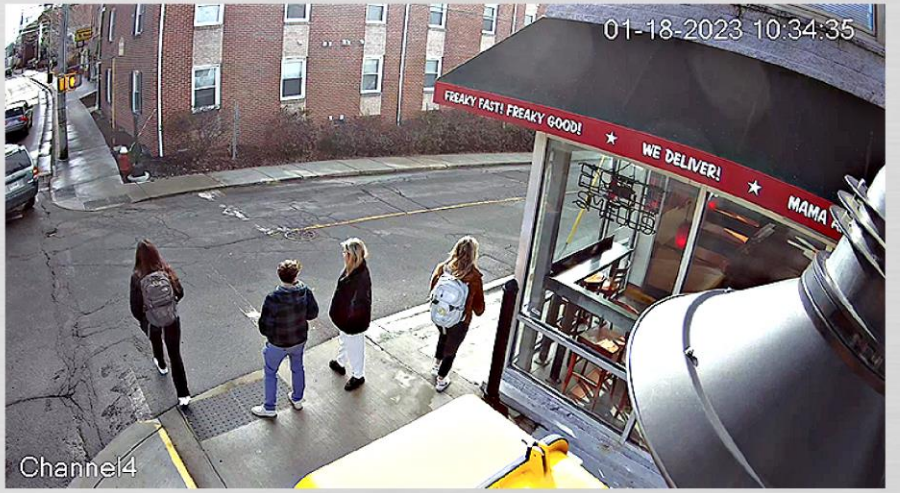

360° Live View & Historical Playback in 4K (One System replaces 5 conventional Cameras)

(note: image resolution reduced for email transmission, only 4 of 5 images shown)

TSUNAMI

License Plate Recognition

(optional add on)

Capture and store License Plate Numbers AND record full vehicle images from TSUNAMI

Records an incredible 60 frames per second (FPS) to capture vehicles up to 100MPH

Capable of integrating with NCIC national criminal database for hotlist alerts

Works effectively both day and night up to 100' distances

2 points of redundancy: Local Video Storage, License Plate Image Server (20+ days)
