BACKGROUND INFO

- Variance BOA-4-2021 was approved in August 2021, allowing the same subdivision shown today. (Carpenter Property Group)
    - The purpose was to separate the properties so they could be appraised separately. Then the beneficiaries could fairly and equally distribute the properties.
- Variance BOA-13-2022 was approved in December 2022, allowing the lots to be recombined. The deed was recorded, finalizing the recombination. (Ziggy Capital)
    - At that time, the reason to recombine was for financial purposes. Lenders would not consider 602 W Childs St as a property that qualified for financing.

Findings of Fact with responses from the applicant

1. Unnecessary hardship would result from the strict application of the ordinance. It shall not be necessary to demonstrate that, in the absence of the variance, no reasonable use can be made of the property.

- "Homes were previously subdivided. Return to this subdivision provides affordable home options for the community."

2. The hardship results from conditions that are peculiar to the property, such as location, size, or topography. Hardships resulting from personal circumstances, as well as hardships resulting from conditions that are common to the neighborhood or the general public, may not be the basis for granting a variance.

- "By subdividing the lot, we allow for two single family properties at a mire adorable price, therefore helping more families find housing."

3. The hardship did not result from actions taken by the applicant or the property owner. The act of purchasing property with the knowledge that circumstances exist that may justify the granting of a variance shall not be regarded as a self-created hardship.

- "Current economic parameters make home ownership difficult with high borrowing costs. The above economic parameters were not caused by the property owner."

4. The requested variance is consistent with the spirit, purpose, and intent of the ordinance, such that public safety is secured and substantial justice is achieved.

- "The subdivision of the homes increases the number of single family homes for sale in the region and creates more affordable price points for the buyer."

Chair requests individual motions and votes on each of the following four findings of fact.
