Town of Fletcher
Requests for Legislative Assistance

Project Name	Organization	Location	Cost Information	Project Description & Cost Share Opportunities
Cane Creek Greenway Extension	Town of Fletcher	Areas along Cane Creek extending from Bill Moore Community Park in Fletcher toward the French Broad River.	$3,000,000 - $5,600,000	The Town of Fletcher has been working for several years with adjoining property owners and Conserving Carolina to extend the Cane Creek Greenway. This would help to create a new leg of our greenway system that could connect with a larger regional system. Funding from the legislature could be used as a potential grant match along with local funding. The Town is also pursuing federal grants for this project.
Fanning Bridge Road Sewer Extension Project	Town of Fletcher	Westfield Road, North Hudson Lane, and Dogwood Terrace located off of Fanning Bridge Road	$700,000 - $900,000	Certain areas of Fletcher do not have sanitary sewer service but could greatly benefit from this service due to struggling septic systems. One particular area that would benefit from the extension of sewer is a neighborhood located off of Fanning Bridge Road. This neighborhood consists of the properties located on Westfield Road, North Hudson Lane, and Dogwood Terrace. The Town has been in communication with the Metropolitan Sewerage District (MSD) to discuss the logistics for extending sewer service to the Fanning Bridge Road neighborhood.
Automated License Plate Reader (ALPR) Implementation	Town of Fletcher Police Dept.	Various intersection locations across the Town of Fletcher	$15,000	The use of ALPR cameras is an emerging technology that has been in place for several years now as a crime fighting tool. The video that is captured of passing vehicles is used to search for suspect vehicles that have been involved in, or tied back to, a crime. The Fletcher Police Department would like to purchase four cameras to start utilizing this technology to help solve crimes in our area.
