RE: Approval of the Assessment of Public Health Rules and Board Policies

To Whom It May Concern:

At its meeting on July 27, 2026, the Burke County Board of Health reviewed the Assessment of Public Health Rules and Board Policies presented by Burke County Public Health. The assessment addressed the three required areas: existing local Board of Health rules, the potential need for new local public health rules, and population health policies that may warrant Board consideration, approval, or advocacy.

The Board acknowledges that no locally adopted Board of Health rules are currently in effect for Burke County Public Health. The Board further confirms that the potential need for new local public health rules and Board-level population health policies was assessed. Based on the findings presented, no new local rules or Board policies were recommended at this time.

Following review and discussion, the Burke County Board of Health approves the assessment as an accurate record of the evaluation completed for FY 2023 through FY 2026.

This approval documents the Board's review of the assessment and does not constitute the adoption of any new public health rule, or ordinance, or policy. Any future proposals for rules or policies will be considered through the appropriate legal and governing processes.
Please retain this letter with the completed assessment and related Board meeting minutes as documentation of the Board's review and approval.

Sincerely,

Jeff Brittain
Chair, Burke County Board of County Commissioners/Board of Health
