115 Fairview Road Project Traffic and Pedestrian Safety Impact

Fairview Road, London Road and Sweeten Creek Road intersect 500 yards west of the 115 Fairview Road development

This intersection is currently

Congested

Chaotic

Uncontrolled

Unsafe

Sweeten Creek Rd
London Rd
828.253.3691

Traffic enters the intersection from

Biltmore Village on Sweeten Creek Rd.

London Road

Sweeten Creek Road East

and Fairview Road

Creating Intense Congestion

Traffic signals with erratic timing

Cause stopped vehicles to be stranded
dead center in the intersection

Triggering longer backups

And dangerous maneuvers

To make it through

The chaotic intersection

Resulting in massive backups

Into Biltmore Village

Pedestrian safety and walkability

Are virtually

Non-existant

No crosswalks

Sidewalks blocked

Non-existant sidewalks

And vehicles driving over the dangerous paths pedestrians must walk.

Pedestrians on Fairview Rd. will increase

Dramatically from the large number of
115 Fairview Rd. project residents

Has any consideration been given to the hundreds of new vehicles the 115 Fairview Road Project will add daily to this already congested, chaotic & unsafe intersection?

Considerations

Appropriate ADA sidewalks throughout the area

Marked pedestrian crossings with timed red hand wait and white light safe to walk signage

New traffic light at intersection of Sweeten Creek Rd. & London Rd. to allow only one direction of London Rd. traffic at a time to go through the intersection.

This will alleviate congestion from left turning vehicles and safety concerns caused by poor sight lines.

Make traffic study and pedestrian safety a priority for the 115 Fairview Road project
