THE CITY OF ASHEVILLE

STAFF REPORT

Council Meeting Date: November 14, 2023

Subject: Set public hearing to permanently close an unopened right-of-way closure between Sulphur Springs Road and Lane Avenue

Staff Resource(s): Ken Putnam, PE, Transportation Department Director
Jessica Morriss, AICP, Transportation Department Assistant Director

Action Requested: Adoption of a resolution of intent to permanently close an unopened right-of-way between Sulphur Springs Road and Lane Avenue, and to set a public hearing for December 12, 2023.

Background:

- North Carolina General Statute § 160A-299 grants cities the authority to permanently close streets and alleys.
- The statute requires City Council to consider whether the closure of the right of way has a negative impact to the public interest and whether the closure would impede access to parcels, utilities, and other public infrastructure.
- Mr. Jeremy Cohen (owner of 158 Sulphur Springs Road) wishes to permanently close an unopened right-of-way that runs roughly north-south between Sulphur Springs Road and Lane Avenue between the following properties:
    - 158 Sulphur Springs Road (Applicant)
    - 160 Sulphur Springs Road
    - 17 Lane Ave
    - 23 Lane Ave
- All property owners abutting the unopened right-of-way have signed affidavits approving of the proposed closure.
- The Applicant has indicated that the purpose of the closure is to allow for the construction of additional housing units on the property.
- The City has not yet received a development application.
- If the Council approves the closure, the unopened right-of-way will be divided among the 4 properties and a new plat will be filed.
- The Technical Review Committee (TRC) reviewed the application at their meeting on July 17, 2023 and recommended that proposal move forward.
    - As part of this review, staff determined that there are no utility conflicts present and that no viable transportation-related connection could be achieved using this right-of-way due to the topography.
    - Additionally, there are other parallel transportation connections nearby therefore a connection using this right-of-way would have limited demand.
    - Therefore, staff determined that there would be no negative public impact from its closure.
    - Additionally, as part of the TRC review, it was noted that there was an unpermitted retaining wall within the unopened right-of-way adjacent to the residence at 23 Lane Avenue (not the applicant). Records indicate that the property was issued a stop work order in 2021.

    - A permit could not be issued due to the wall having been constructed in the right-of-way.
    - Approval of this right-of-way closure request would also bring the wall into compliance and a permit could be issued.

- The Multimodal Transportation Commission (MMTC) reviewed the request on August 23, 2023, and voted to recommend that the City Council deny the right-of-way closure request (5-2).
- The MMTC recommendation to deny the request was largely due to concerns regarding the presence of the unpermitted retaining wall at 23 Lane Avenue and the desire to have staff complete a comprehensive study of all unopened rights-of-way within the City to identify possible opportunities for transportation connections to be made, particularly for bicyclists, pedestrians, and people with disabilities.
    - Staff advised the MMTC that the unpermitted wall would be brought into compliance if the right-of-way were closed and that the presence of the unpermitted wall did not seem to be within the scope of the factors that the City Council would consider, per statute, in deciding to close the right-of-way.
    - Separately, staff advised the MMTC that a comprehensive review of all unopened rights-of-way within the City would be an extensive project that is not currently on staff's work program.

Council Goal(s):
- A Well-Planned and Livable Community

Committee(s):
- Technical Review Committee, July 17, 2023, unanimously recommended approval.
- Multimodal Transportation Commission, August 23, 2023, recommended denial (5-2) - see above.

Pro(s):
- There are no utility conflicts, nor any transportation connectivity opportunities associated with this unopened right-of-way.
- The existing unpermitted retaining wall that was constructed within the unopened right-of-way would become compliant and a permit can be issued.

Con(s):
- None.

Fiscal Impact:
- This action requires no City resources and has no fiscal impact.

Suggested Motion:
- Motion to adopt a resolution to set a public hearing for December 12, 2023, to permanently close an unopened right-of-way between Sulphur Springs Road and Lane Avenue.
